Zentech's Matt Turpin Appointed to IPC's Government Relations Steering Committee

March 3, 2015 (Baltimore, Md.)

[Zentech Manufacturing, Inc.](#) is pleased to announce that CEO and President, Mr. Matt Turpin, was appointed to the IPC Government Relations Steering Committee at the IPC Annual Meeting (APEX) last week in San Diego, CA.

[The IPC Government Relations \(GR\) Steering Committee](#) works to further IPC members' interests by advocating for policies that foster economic growth and job creation and to enhance the international competitiveness of the electronic interconnection industry. The Committee addresses the range of issues that affect IPC member companies, such as: technology policy supporting electronic interconnection research and development, environmental initiatives that support science-based environmental protection, smart regulatory reform and other issues as determined by Committee members.

[IPC](#) participates in the political and administrative processes in response to, and in advance of, public policy proposals by presenting views to policymakers. IPC influences policy through the consistent development of high quality, fact-based positions on issues affecting the electronics industry.

In addition to releasing its [Global Policy Framework](#) at APEX, IPC also announced the dates of its major U.S. public policy event of the year, "IMPACT 2015: IPC ON CAPITOL HILL." This two-day event will take place on April 29 and 30, 2015 in Washington, D.C., giving C-level executives a unique opportunity to interact with senior policymakers and advise them on issues that affect the electronics industry. For a recap of last year's IMPACT 2014 event, click [here](#).

About IPC:

Since 1957, IPC — Association Connecting Electronics Industries® has been guiding the electronic interconnection industry through its dramatic changes. A global trade association dedicated to the competitive excellence and financial success of its more than 3,500 member companies, IPC represents all facets of the industry including design, printed board manufacturing, and electronics assembly and test. As a member-driven organization and leading source for industry standards, training, market research and public policy advocacy, IPC supports programs to meet the needs of an estimated \$2 trillion global electronics industry.

About Zentech Manufacturing:

Zentech is a privately held, engineering-driven electronics contract manufacturer specialized in the design and manufacture of highly complex electronic and RF circuit cards and subassemblies. The company is located in its purpose built facility located in Baltimore, Md., and maintains several key certifications, including: ISO 9001:2008, ITAR, AS 9100 (aerospace) and ISO 13485 (medical). Zentech is also certified as a Trusted Source for IPC Class 3 mission-critical electronics, and IPC J-Std-001 Space addendum QML certified.
